

## NUCLEAR SAFETY POLICY

10 September 2024 - Rev.01

Gaia Monchieri - CEO

Through this document, **the Management of Forge Monchieri** undertakes to achieve excellence in its activities to avoid that products for the nuclear market could cause accidents (**Nuclear Safety**) and declares that this condition has the highest priority over all the needs coming from other goals of the company. In summary:

**" NUCLEAR SAFETY FIRST ! "**

In particular, it is committed to:

1. Recognize that **nuclear technology is special and unique** and therefore it requires extraordinary actions to ensure the safety of the world's population and the preservation of the environment.
2. Put **nuclear safety first** in every business decision.
3. Spread the **Culture of Nuclear Safety**, through training, to ensure that every member of the organization, at every level, is aware that their actions can have disastrous consequences.
4. Define **roles and responsibilities** within the organization.
5. Ensure **adequate resources**, both in terms of number and skills.
6. Promote a **rigorous and prudent approach** and a **questioning attitude** towards anomalies.
7. Promote **transparent communication**, especially in case of non-compliance or suspicious situations, as also required by the **10CFR21 and 10CFR50** regulations of the United States of America.
8. Define procedures to formalize the rules, in order to **avoid ambiguities or misinterpretations** and **increase the self-control** of individual activity.
9. Systematically perform **tests, inspections, audits and periodic reviews** of the System.
10. Adopt appropriate procedures for the detection and handling of counterfeit, fraudulent or suspicious products or documents (**CFSI**).
11. Promote the identification of **Lessons Learned** from experience.
